

In this example, case 2:

Class size = 83

18 groups of 4 or 5 for expert / self-teach groups.

14 groups of 5 or 6 for jigsaw / cross-teach groups.

In this case, every learner hears every topic and gets to inform 4 or 5 others of their own. A report-back in self-teach groups could pool all 18 topics in principle.

In this case, with a class size that is a prime number, groups of the same kind have to vary in size by 1 as the class size isn't exactly divisible.

Table 1: by name

Name	Self-teach group	Cross-teach group
Austen, Ian	15	L
Austen, Zak	14	H
Black, Janet	10	D
Black, Yolanda	2	F
Bolton, Adam	16	B
